},
{

},
{

"dialogue": "Actually, a week ago, I was in, um, North Carolina for a family reunion."

TEAM 8

},
{
"timestamp": "08:48",
"dialogue": "Okay. And there was a four-year-old who was sick there. I I don't know what they had, but they I guess I guess they ended up taking them into emergency."
},
{
"timestamp": "08:51",
"dialogue": "Okay."
},
{
"timestamp": "09:01",
"dialogue": "Um, so let me just summarize to make sure I've got everything straight so far is, um, you start having onset of a severe headache about three days ago. Um, it's worse with movement and like really makes it hurt bad. Um it's a 10 out of 10 pain and you're also complaining of a stiff neck with that."
},
{
"timestamp": "09:05",
"dialogue": "Yeah."
},
{
"timestamp": "09:06",
"dialogue": "Yeah."
},
{
"timestamp": "09:19",
"dialogue": "Yes. Um it came on gradually and it's been constant pain in the frontal area. Um medical history, you're in hyper you have high blood pressure but that's um controlled with diet. Uh, no surgical history, no really hospitalizations. Um the pain now is really impacting your day-to-day living and daily life. Um, you took try to it didn't help. Otherwise, no medications. Um, you've got the family history of your mom with migraines, otherwise your um family is healthy. Uh, you smoke about a half a pack a day, you don't drink. Um, and then you were you you said you took a trip about a week ago or two weeks ago."
},
{
"timestamp": "09:19",
"dialogue": "Uh-huh."
},
{
"timestamp": "09:24",

},
{
"timestamp": "09:58",

},
{
"timestamp": "09:58",
"dialogue": "It's a family reunion, about a week ago. Uh, yeah, I don't know. It was in North Carolina."
},
{
"timestamp": "10:03",
"dialogue": "Yeah."
},
{
"timestamp": "10:07",
"dialogue": "All right. Um yeah, I can understand your concern. You about your friend, you said that was having seizures. Um I've just never had this kind of pain before. Yeah, and I can understand that and, you know, um, so what I would like to do is, um we've pretty much gone over your the history. What I'd like to do is uh complete a physical exam. Um, do some testing."
},
{
"timestamp": "10:15",
"dialogue": "Yeah."
},
{
"timestamp": "10:23",
"dialogue": "Okay."
},
{
"timestamp": "10:31",
"dialogue": "All right. Um and I want to ask too if there's any other concerns I need to address uh before we get to the final exam."

"dialogue": "Okay."
},
{

},
{
"timestamp": "10:42",

},
{
"timestamp": "10:54",
"dialogue": "Hi, I'm Deb. I'm your standardized patient. Right. Nice job. Um I'm going to uh give you some feedback on your communication skills uh in this encounter. But before I do, how did you feel?"
},
{
"timestamp": "10:55",
"dialogue": "Yes I brief."
},
{
"timestamp": "11:11",
"dialogue": "feel it went?"
},
{
"timestamp": "11:12",
"dialogue": "Um, I felt pretty good. I was I was nervous at first, I think, and um just trying to make sure that um I was getting all your patient information so we could, you know, make sure we got the correct tests and yeah, yeah, you know. Yeah. How did you feel when you when you walked in? You feel pretty comfortable?"
},
{
"timestamp": "11:21",
"dialogue": "Yeah."
},
{
"timestamp": "11:26",
"dialogue": "Uh, I think I got more comfortable as we sat down and got to talking."
},
{
"timestamp": "11:30",
"dialogue": "Yeah."
},
{
"timestamp": "11:30",

TEAM 8

"dialogue": "Yeah, I can see that. Yeah. Good. Okay. Um well, I thought you did a a nice job. Uh you had an appropriate introduction."
},
{
"timestamp": "11:31",
"dialogue": "Yeah."
},
{
"timestamp": "11:36",
"dialogue": "uh introduced yourself, first and last name, shook hands. Um, I think you have a very warm demeanor and you're comfortable, uh, which makes me as a patient comfortable. You did um uh elicit my chief complaint and asked about any other concerns and that's when I told you I was also concerned about my insurance. So that was another uh thing on the agenda. So you did set a mutual agenda, asked me if I agreed. And so we had a clear road map going forward. So you did, um, you hit all those real well. You, your first question, tell me about this pain or, um, that was a nice open-ended question. So allowed me to then tell my story. Um followed up with some more, um pointed questions just for clarification on, um and you had, you're an active listener, had good contact, uh, eye contact and, um could do a little bit more, um uh reflective listening, um just to little points where you could verify, um check for accuracy, maybe paraphrase as as I'm going through through, um, you did a nice summary, uh, in the middle. That's good, but just a little bit more reflection on that to let me know as a patient that you're hearing me. Um you asked my perspective of what I thought was going on and then you got the story, um, of my fear that I got a brain tumor. Oh no."
},
{
"timestamp": "11:36",
"dialogue": "Okay."
},
{
"timestamp": "12:12",
"dialogue": "Right. Right."
},
{
"timestamp": "12:30",
"dialogue": "Yeah. So, um, I thought you had nice flow, logical, uh, uh sequence of questioning. Um a little bit of sign posting. We just covered this and now we're going to do that. I I heard that once. Um and as these, um, interviews get longer, you're going to want to sign post between each, um, section. I've taken your history. Now I'd like to go into, uh, um of a physical exam or anything. Um did a nice summary in the middle. Uh, you moved through quickly, so you attended to, um, the timeline. You did ask permission permission to ask some, um, uh social questions. Maybe you want to mention, um social questions may not be a a flag for me that this is that this could be personal or uncomfortable. Maybe, I'm going to ask a little more some personal questions here. Is that all right with you? Just so I'm social questions sounds fine to me until you start asking something that might sound personal. So you might use the the word, uh, some more personal, uh questions here. Uh, non non-judgmental, didn't, you know, didn't bat an eye when when I said I smoke half a pack. Um, you have nice,

uh, vocal range, eye contact, um, comfortable demeanor, so, uh, that, um, felt real good. And then, um, you, uh, did a summary, uh at the end and, um asked did you ask do anything else? Okay. So, anything else before, um, we do a physical exam. So, it was very nice, nice encounter."

They demonstrated an understanding of the need to rule out serious causes of headache, given the patient's concern about a brain tumor. However, a specific differential diagnosis was not verbalized, and the plan to 'do some testing' lacked detail. The main area for improvement is in verbalizing the differential diagnosis and outlining a clear, specific plan for the physical exam and subsequent testing. Incorporate reflective listening more consistently and explicitly in patient encounters. Overall, solid performance but needs more explicit clinical reasoning."
