OSCE Evaluation Report

Rutgers Robert Wood Johnson Medical School

Generated: October 11, 2025 at 07:20 PM

Overall Performance

Metric	Score	Status
Critical Actions	60%	Fail
Communication & Empathy	100%	Pass
Overall Result		**FAIL**

Summary Feedback

Student was able to summarize the history and ensure the patient felt heard, but missed key elements for data gathering.

Strengths:

- [00:00:11] - Cordial demeanor; fostered patient connection.
- [00:02:09] - Expressed empathy and reassurance about pain.
- [00:09:20] - Summarized history and confirmed accuracy.

Areas for Improvement:

- [00:03:50] - Missed asking about medication history; data completeness.
- Did not perform physical exam; limits exam synthesis.
- Lacked specific differential or red flag considerations.

Summary:

Performance shows areas for improvement in exam synthesis and data collection, while demonstrating strong communication skills.

Critical Action Checklist

Hypothesisgeneration

✓ [00:00:17] - Asked about the chief complaint and if there were any other concerns, starting to explore potential causes.

The student correctly began to frame the encounter around the chief complaint and other patient concerns.

✓ [00:02:26] - Asked if anything brought on the headache, attempting to identify triggers or inciting events.

The student began to explore potential triggers of the headache which can indicate potential system involvement.

✓ [00:03:36] - Followed up on pain radiating to the neck and stiffness, suggesting musculoskeletal involvement.

The student tailored questions based on the patient's description of pain and associated symptoms, narrowing down possible systems involved.

✓ [00:03:03] - Asked about things that make it worse, with the patient identifying movement and light, suggesting vascular headache.

Asking about factors which exacerbated the pain, and receiving information that light and movement increase the pain suggests possible vascular involv

✓ [00:03:53] - Clarified the timing and consistency of the headache being constant.

The student inquired about timing, duration and qualities about the headaches to identify the nature of the origin.

Datagathering

✓ [00:01:33-00:03:15] - Utilized OPQRST to thoroughly describe pain.

Student used a range of open and closed questions to probe details.

✗ Limited ROS; no mention of vision changes, fever, weakness.

ROS limited; major pertinent negatives missing regarding constitutional symptoms.

✗ No physical exam performed within the video.

The student only asked questions but did not perform any physical exams, which are essential to data gathering.

✓ [00:03:36] - Asked further details regarding radiation and stiff neck.

When the patient described stiff neck, the student further inquired about the symptoms to gather more information about potential origin.

✓ [00:02:41] Asked the patient what they have taken to relieve the pain.

The student asked the patient what medication they've taken to relieve the pain.

Problemrepresentation

✓ [00:09:20] - Summarized the patient history after data collection.

The student summarized the information to make sure that everything was accurate.

✓ [00:09:20] - Repeatedly confirms information and concerns with the patient throughout interview.

The student would constantly confirm and affirm information to make sure that it was accurate.

✓ [00:09:20] - Structured summary touched on key symptoms and history.

Student provided a structured summary that was easy to follow and highlighted key areas.

✓ [00:09:20] - Student asks additional clarifying questions at the end.

The student was able to make sure to ask additional clarifying questions at the end.

✓ [00:09:20] - The student summarized key social history items.

The student was able to mention key social history items to review.

Differentialdiagnosis

✗ No differential diagnosis mentioned during interview.

Student did not state any differential diagnosis; gaps in synthesis.

✗ No justification given as no differential stated.

Given that no differential was stated, there was no reasoning offered.

✗ No discussion of serious causes like tumor or bleed.

Student acknowledges patient's worry about tumors but doesn't explicitly address or rule out red flags.

✓ [00:11:26] - Student mentioned plans to proceed with a physical exam and further testing.

The student mentioned plans to proceed with the physical exam and testing.

✓ [00:11:26] - Student mentions they will address other concerns.

Student ensures the patient that their concerns will be addressed before moving on.

Communication & Empathy Assessment

Fosteringrelationship

✓ Sets stage for the encounter and patient comfort.

[00:00:11] - Asked about preferred name.

✓ Listens actively and conveys understanding.

[00:04:58] - Acknowledged patient concern.

✓ Shows care and compassion.

[00:02:09] - Expressed empathy for the patient's experience with headache and light sensitivity.

Gatheringinformation

✓ Encourages patient to share openly, avoids interruption, uses reflective prompts.

[00:01:33] - Student actively listens to the patients' headache history.

Providinginformation

✓ Adjusts explanations to patient’s knowledge level; confirms comprehension.

[00:09:20] - Summarized history for patient confirmation.

Helpingpatientdecisions

✓ Encourages shared decision-making, asks for patient preferences, involves them in next steps.

[00:11:26] - Outlined plans to proceed with physical exam and testing.
