OSCE Evaluation Report

Rutgers Robert Wood Johnson Medical School

Generated: October 11, 2025 at 07:23 PM

Overall Performance

Metric	Score	Status
Critical Actions	60%	Fail
Communication & Empathy	100%	Pass
Overall Result		**FAIL**

Summary Feedback

The student established a comfortable rapport and explored the history in a patient-centered manner. The student failed to complete the physical exam and explicitly provide a differential diagnosis.

Strengths:

- [00:00:17] - Student introduced themselves and their role.
- [00:01:30] - Student used open-ended questions.
- [00:04:56] - Acknowledged the patient’s worry, demonstrating empathy.

Areas for Improvement:

- [00:03:04] - Student did not perform a physical exam.
- [00:09:13] - Student did not provide a differential diagnosis.

Summary:

Performance demonstrated solid communication and rapport. A physical exam and differential must be provided.

Critical Action Checklist

Hypothesisgeneration

✓ [00:01:04] STUDENT: Let's take a look at what's causing your headache.

Student acknowledged the primary complaint and signaled the intent to investigate possible causes, reflecting an initial broad hypothesis.

✓ [00:03:33] PATIENT: Shooting pain down my neck and my neck is very stiff.

By noting the neck stiffness alongside the headache, the student implicitly considered musculoskeletal or neurological systems.

✓ [00:03:52] STUDENT: As far as in the timing...hasn't gone away. It doesn't get better, doesn't get worse. It's just the same.

The student focused on key headache characteristics (timing, location, exacerbating/relieving factors), demonstrating an attempt to gather data releva

✓ [00:04:28] PATIENT: My neighbor... brain tumor. So I thought I should come in.

By exploring the patient's concerns about a brain tumor the student attempts to rule out the most serious causes.

✓ [00:07:43] STUDENT: You haven't been nauseous?

Directly asking about nausea assesses common symptoms linked to headache syndromes like migraines.

Datagathering

✓ [00:01:30] STUDENT: Tell me a little bit more about this...head pain that you're having?

The initial open-ended question invited a narrative description of the patient's symptoms.

✗ ...

Although the student touched on nausea, the ROS was not comprehensive, missing key areas (e.g., visual changes, weakness, sensory changes).

✗ ...

The student did not perform or mention any specific physical exam maneuvers during the encounter.

✓ [00:03:33] PATIENT: Shooting pain down my neck and my neck is very stiff.

Student followed up on patient mention of neck stiffness.

✓ [00:05:22] STUDENT: The only medicine you're taking was the telling all?

Asked about medications taken to alleviate the pain.

Problemrepresentation

✓ [00:08:43] STUDENT: So let me just summarize to make sure I've got everything straight so far...

Student provided a comprehensive recap of key history elements.

✓ [00:09:55] STUDENT: All right.

Patient affirmed accuracy of summary.

✓ [00:09:22] STUDENT: ...the pain isn't really impacting your day to day living daily life...

The summary presented information clearly.

✓ [00:09:41] STUDENT: You said you took a trip about a week ago...

Acknowledged recent travel and potential exposures as relevant contextual factors.

✓ [00:09:13] STUDENT: And you were You did you said you took a trip about a week ago weeks ago.

Summary included both the patient's report of neck stiffness (positive) and absence of surgical history (negative).

Differentialdiagnosis

✗ ...

The student did not explicitly discuss or propose any differential diagnoses during the observed interaction.

✗ ...

Without proposing a differential, no justification was provided.

✗ ...

The student's line of questioning did not explicitly discuss common vs. serious possibilities.

✓ [00:09:56] STUDENT: So what I would like to do is uh complete a physical exam. Okay.

Mentioned the intention to perform a physical exam.

✗ ...

The student's plan did not adapt demonstrably to new details.

Communication & Empathy Assessment

Fosteringrelationship

✓ Sets stage for the encounter and patient comfort.

[00:00:03] STUDENT: Hi, I'm Tony, I'm Harris, I'll be your doctor today.

✓ Listens actively and conveys understanding.

[00:02:16] STUDENT: Okay.

✓ Shows care and compassion.

[00:04:56] STUDENT: Yeah, yeah, I can understand your concern.

Gatheringinformation

✓ Encourages patient to share openly, avoids interruption, uses reflective prompts.

[00:01:30] STUDENT: So tell me a little bit more about this the head head pain that you're having.

Providinginformation

✓ Adjusts explanations to patient’s knowledge level; confirms comprehension.

[00:01:10] STUDENT: I will go over history and physical and then, um, we'll do uh again a physical exam, and then we will look into your insurance pol

Helpingpatientdecisions

✓ Encourages shared decision-making, asks for patient preferences, involves them in next steps.

[00:09:56] STUDENT: So what I would like to do is uh complete a physical exam. Okay.
